

VISUAL STUDIO

Final Site Audit

Complete Page-by-Page Checklist

Every page on visualstudioslens.com — what's done and what's not

Based on live fetches of all 11 pages, May 2026

Prepared for

SAIKAT

From

Mohammed Sakib Mahmood

Founder, Visual Studio | Visual Inked LLC

How to Use This Checklist

This is the master site audit. Every single page on visualstudioslens.com has been fetched live and reviewed against every recommendation made across the previous briefs.

LEGEND

- ✓ Green check = item is implemented and working on the live site
- ✗ Red X = item is missing, broken, or needs fixing

HOW TO WORK THIS DOCUMENT

1. Saikat works through every red X in order of section priority.
2. Each item has Evidence — exact text or URL from the live site so you can verify before changing.
3. After each fix, Sir or Saikat can mark it green to track progress.
4. Final summary on the last page lists everything still outstanding.

NOTE — NO PRICING DETAILS

As Sir requested, this audit does NOT mention pricing numbers, package costs, or specific dollar amounts. Pricing structure issues are flagged as a category only, not by specific values.

Contents

Site overview	4
Section A — Sitewide / cross-page items	5
Section B — Homepage (/)	8
Section C — Portfolio (/portfolio)	10
Section D — Video Gallery (/video-gallery)	11
Section E — Visual Marketing (/visual-marketing)	12
Section F — More Services (/more-services)	14
Section G — Store (/store)	16
Section H — About (/about)	17
Section I — Contact (/contact)	19
Section J — Muslim-Friendly Services	20
Section K — FAQ (/faq)	21
Section L — Privacy Policy (/privacy-policy)	22
Section M — Terms of Service (/terms-of-service)	23
Section N — Pages NOT yet built	24
Section O — Technical SEO infrastructure	25
Section P — Final priority summary	26

Site Overview

The site has 11 fully accessible pages plus 2 legal pages. All pages are on Next.js with proper sub-page URLs, meta tags, and Open Graph data.

Pages confirmed live

11 Pages live		
-------------------------	--	--

- Homepage (/)
- Portfolio (/portfolio)
- Video Gallery (/video-gallery)
- Visual Marketing (/visual-marketing)
- More Services (/more-services)
- Store (/store)
- About (/about)
- Contact (/contact)
- Muslim-Friendly Services (/muslim-friendly-services)
- FAQ (/faq)
- Privacy Policy (/privacy-policy)
- Terms of Service (/terms-of-service)
- Packages (/packages) — pricing structure reviewed but specific numbers excluded per request

Pages confirmed NOT live

- ✗ /no-photo-security — referenced in earlier briefs, never built
- ✗ /business-setup — for the 'Set Up My Business' CTA, never built
- ✗ /web-design — for the 'Build My Website' CTA, never built
- ✗ /events — linked from /more-services footer but returns 404
- ✗ /blog — does not exist (would help SEO long-term)
- ✗ /sitemap.xml — does not exist
- ✗ /robots.txt — does not exist
- ✗ /llms.txt — does not exist

A. Sitewide / Cross-Page Items

These items affect every page on the site or appear in shared components (header, footer, navigation).

A.1 Header navigation

✓	Logo + brand name 'Visual Studios' in top-left header on every page
✓	Main nav with 8 links: Home, Portfolio, Video Gallery, Visual Marketing, More Services, Store, About, Contact
✓	WhatsApp link in header on most pages <i>Evidence: https://wa.me/13473066637 visible in header on /, /packages, /video-gallery, /store, /contact, /muslim-friendly-services, /privacy, /terms</i>
✗	WhatsApp link in header on ALL pages <i>Evidence: Missing on /portfolio, /visual-marketing, /more-services, /about, /faq — these use a different header component</i>
✓	'Book Now' CTA in header on every page

A.2 Footer — sitewide consistency

✗	Single shared footer component used on all pages <i>Evidence: Two different footer variants exist: one with WhatsApp + correct phone, one without WhatsApp using wrong phone</i>
✓	Correct phone number in footer (347-306-6637) on most pages <i>Evidence: Correct on /, /packages, /video-gallery, /store, /muslim-friendly-services, /faq, /contact, /privacy, /terms</i>
✗	Phone number consistent across ALL pages <i>Evidence: /more-services footer shows wrong number: +1 (929) 627-5537</i>
✗	WhatsApp link in footer on ALL pages <i>Evidence: Missing on /portfolio, /more-services, /about, /faq footers</i>
✓	Address listed in footer (1097 Liberty Avenue, Brooklyn, NY 11208)
✓	Email lens@visualstudioslens.com in footer

All footer Resource links work

Evidence: /more-services has 'Client Portal → #' and 'Download Pricing PDF → #' (both dead links)

/events page exists

Evidence: Linked from /more-services footer but returns 404 — must be removed from footer or built

A.3 Floating WhatsApp button

Floating WhatsApp link on every page

Evidence: <https://wa.me/13473066637> appears at bottom of HTML on all pages

A.4 Brand name consistency

Most pages use 'Visual Studio' or 'Visual Studios & Events' in title and headings

ALL pages use 'Visual Studio' brand name in body content

Evidence: /about page still uses 'X Studios' and 'X Print' throughout — every team bio, the origin story, the page subheading

Legal name spelled correctly in all legal copy

Evidence: Privacy Policy and Terms both say 'Visual Studios & Events & Events' — '& Events' duplicated as a typo

A.5 Phone number consistency (NAP / local SEO)

Single canonical phone number used across the entire site

Evidence: Two different numbers live: 347-306-6637 (most pages) vs 929-627-5537 (/more-services footer)

A.6 Sneak peek timing claim

Consistent '72 hours' across hero, FAQ, and packages page

Evidence: Previously was 78hr on FAQ — now resolved sitewide to 72hr

A.7 Meta tags and Open Graph

✓	Every page has unique meta-description
✓	Every page has og:title, og:description, og:image, og:url
✓	Every page has twitter:card, twitter:title, twitter:description
✓	Every page has canonical URL
✓	meta robots set correctly on content pages (index, follow)
✗	twitter:card consistent across all pages <i>Evidence: Homepage uses 'summary' / about + portfolio + faq use 'summary_large_image' — pick one</i>
✗	Privacy and Terms have correct robots tag <i>Evidence: Both set to 'noindex, nofollow' — minor issue but legal pages indexed normally show legitimacy</i>
✗	OG tags on legal pages reference the correct page <i>Evidence: /privacy-policy and /terms-of-service have og:url pointing to homepage instead of their own URL</i>

A.8 Schema markup (JSON-LD)

✗	LocalBusiness schema in root layout <i>Evidence: No JSON-LD detected in HTML of any page</i>
✗	Organization schema in root layout
✗	Service schema on homepage and service pages
✗	FAQPage schema on homepage and /faq
✗	Review / AggregateRating schema for testimonials
✗	BreadcrumbList schema on sub-pages

B. Homepage

/

Status: Mostly complete. Strongest page on the site.

B.1 Hero section

Premier headline mentioning South Asian & Muslim weddings + NY/NJ/CT

Two CTAs: View Portfolio + Book a Session

Stats bar: 1,000+ weddings, 72-hour sneak peeks, female crews, NY/NJ/CT, free consultation

B.2 Cultural traditions section

All 6 tradition cards present: Bengali, Pakistani, Indian, Sikh, Arab & Afghan, Multi-Cultural

Specific ceremony names listed under each (Holud/Akht, Mayun/Mehndi/Baraat/Walima, etc.)

Link to /portfolio

B.3 Female crew section

Dedicated section with H2 'Female Crews & Female Editors — Available On Request'

Strong supporting copy mentioning hijabi brides, conservative families, end-to-end female workflow

CTA → /muslim-friendly-services

B.4 What's Included section

Three columns: Photography, Cinematography, Extras

Hardcoded list items visible to crawlers

B.5 Testimonials section

✓	6 named reviews present: Zainab R., Fatima A., Malaika S., Nasheed K., Priya M., Ayesha T.
✓	Each review has name, event type, location, full quote, and avatar initials
✓	Section heading: 'What Our Clients Say — Real families. Real weddings. Real words.'
✓	Three CTAs: Leave Google Review, Send via WhatsApp, Tag on Instagram
✗	Reviews appear once each in static HTML <i>Evidence: All 6 reviews currently repeat 3 times in HTML markup — crawlers see 18 review instances (duplicate content)</i>
✗	Source badge on each review (Google / Instagram) <i>Evidence: Reviews show name + event but no source attribution</i>

B.6 Booking and contact area

✓	Three cards: Book a Consultation (Calendly), Contact Us, Pricing Guide
✓	Calendly link works (calendly.com/lens-xstudioslab/book-a-photography-session)
✓	Call Now link with correct phone

B.7 FAQ section

✓	5 questions present and visible on the homepage
✓	Questions cover: female crews, multi-day packages, turnaround, traditions, deposit
✓	Answers visible in HTML (not behind JavaScript on homepage)
✗	Wrapped in FAQPage schema for Google rich results

B.8 Instagram section

✓	@visualstudio Instagram strip with 6 image links
✓	Follow on Instagram CTA

B.9 Newsletter

✓	Stay Inspired newsletter signup section
---	---

C. Portfolio

/portfolio

PAGE STATUS — MOSTLY EMPTY

This is the most conversion-critical page for a photography business and it currently has no photography on it. The page contains only a heading, one paragraph, and one button linking to the external Pixieset gallery.

C.1 Page meta and structure

Page exists with proper URL

Meta description and OG tags set correctly

Canonical URL set

C.2 Page content

Photo gallery grid on the page

Evidence: Page only has heading 'Full Client Galleries' + one paragraph + 'Explore Gallery' button — no photos visible

Galleries organized by event type (weddings, engagements, commercial)

Evidence: No category structure on the page

Galleries organized by cultural tradition (Bengali, Pakistani, etc.)

Evidence: No cultural filtering or sub-categories

Image alt text for SEO + accessibility

Evidence: No images = no alt text to audit

'Reactions' content section (clients seeing photos for first time)

Evidence: Not present

'Who we worked with' commercial logos/names

Evidence: Not present

Pixieset link works

Evidence: → <https://gallery.visualstudioslens.com/>

C.3 Footer on this page

WhatsApp 'Us' link in footer

Evidence: /portfolio uses the alternate footer without WhatsApp — has phone, email, address only

D. Video Gallery

/video-gallery

PAGE STATUS — EMPTY

Page exists with proper meta tags and structure but contains zero actual video content. Heading 'Video Gallery' + one subtitle line is the entire body.

D.1 Page meta and structure

Page exists with proper URL

Strong meta description and keyword targeting

OG image and twitter:card set correctly

D.2 Page content

Embedded videos on the page

Evidence: Page has heading + subtitle + nothing else. Body content: 'Our Films — Video Gallery — Cinematic storytelling, commercial reels, and breathtaking event coverage.'

YouTube embeds for highlight reels

Categorized video sections (weddings, commercial, social content)

Same-day edit examples

Featured cinematic film on the page

D.3 Header and footer

WhatsApp in header

WhatsApp 'Us' in footer

Correct phone (347-306-6637) in footer

E. Visual Marketing

/visual-marketing

Status: Strong copy, but visual assets and CTA structure both need work.

E.1 Header and meta

Strong page title and meta description

OG image, og:title, twitter:card all set

WhatsApp in header nav

Evidence: /visual-marketing header has no WhatsApp icon — only Book Now

E.2 Hero and intro

'Corporate Branding' eyebrow + 'Visual Marketing' H1

Strong hero copy about visual assets driving engagement

E.3 Service sections

Brand Photo & Video section with full copy

Product Photo section with e-commerce / Shopify mention

Commercial Video & Social Content section (Reels, TikTok, brand films)

Corporate Headshots & Team Photos section

Female team / female photographer mention for women-only commercial shoots

Evidence: No mention of female photographer option for businesses with female-only client needs

E.4 'Our Work' grid

6 work cards with categories (Brand, Campaign, Social Media, Product, Headshots)

Real commercial work shown (not placeholder GIFs)

Evidence: All 6 cards still link to media[0-4].giphy.com URLs — Product Launch, Campaign Visuals, Social Content, E-Commerce, Corporate Headshots, Ad Creatives all use Giphy as placeholders

Self-hosted assets (not third-party CDN)

Evidence: All visuals served from giphy.com — no domain authority for Visual Studio

Descriptive alt text on each image

Evidence: Images are GIFs from Giphy with generic names

E.5 Bottom CTAs

✓	'Ready to Start a Project?' CTA section
✗	Three CTA buttons (Marketing Videos, Set Up My Business, Build My Website) <i>Evidence: Only ONE CTA button exists: 'Start a Project → /contact'. The three-CTA structure from the brief is not implemented</i>
✗	Each CTA routes to its own intake form <i>Evidence: No business-setup or website-build intake exists yet</i>

E.6 Footer on this page

✓	Phone, email, address present
✗	WhatsApp 'Us' link in footer <i>Evidence: Missing — uses alternate footer variant</i>

F. More Services

/more-services

PAGE STATUS — MULTIPLE BUGS

This page has the most accumulated bugs of any page on the site. The footer uses the wrong phone number, three partner cards link to the wrong Instagram, and two Resource links go to dead anchors.

F.1 Header

Logo + nav links present

WhatsApp in header nav

Evidence: /more-services header has no WhatsApp icon — only Book Now button

F.2 Partner cards

6 service cards present: Stage & Decorations, Henna/Mendhi, DJ & MCs, Cakes & Desserts, Album Books, 360 & Photo Booths

Each card has title and 'View Partner' or 'Visit Store' CTA

All partner cards link to correct Instagram

Evidence: Stage & Decorations, DJ & MCs, AND 360 Booths all link to instagram.com/neonskiesdecor — three different services pointing to the same partner

Henna partner correct (sumiyashennaart)

Cakes partner correct (sweetzbyluckyllc)

Album Books → /store (correct internal link)

F.3 No-Photo Security card

No-Photo Security service card added to grid

Evidence: Brief calls for this card with title 'No-Photo Security' and 'Privacy-first event coverage' subtitle. Not yet added

Dedicated /no-photo-security landing page exists

F.4 Footer (this page only)

X	Correct phone number in footer <i>Evidence: Footer shows +1 (929) 627-5537. All other pages use +1 (347) 306-6637</i>
X	WhatsApp 'Us' link in footer <i>Evidence: Missing on this page's footer</i>
X	Footer Resource links work <i>Evidence: 'Client Portal' → # (dead anchor) 'Download Pricing PDF' → # (dead anchor)</i>
X	Footer Explore links all valid <i>Evidence: Footer lists 'Events & Decor' → /events but that page returns 404</i>
✓	Address present in footer (1097 Liberty Avenue Brooklyn)
✓	Email present in footer

G. Store / Print Shop

/store

Status: Well-built page with strong copy. Minor improvements possible.

G.1 Page structure

Hero with 'Preserve Your Legacy' messaging

5 product category cards: Albums & Books, Wall Art, Print Sets, Album Sets, Photo Prints

Each card has 'Inquire Now' CTA

G.2 Product detail sections

Wedding Photo Albums section with detailed copy (lay-flat, archival paper, linen/leather/velvet covers)

Canvas & Metal Wall Art section with size range

Fine Art Prints section with paper type

'Coming Soon' section for framing and custom gifts

Newsletter signup CTA for product launch notifications

G.3 Order info

Shipping window mentioned (4–6 weeks)

WhatsApp link for rush orders

G.4 Header and footer

WhatsApp in header

✓	WhatsApp 'Us' in footer
✓	Correct phone in footer

H. About

/about

PAGE STATUS — MOST URGENT FIX ON THE SITE

This page is the most damaging unfixed page on the entire site. Every team bio, the origin story, and the page subheading still say 'X Studios' and 'X Print' instead of 'Visual Studio' and 'Visual Ink Printing'.

When Google or ChatGPT crawls this page, they're learning that the company is named 'X Studios'. When they crawl the homepage, they see 'Visual Studios & Events'. This brand-name conflict directly hurts entity recognition.

H.1 Page heading and intro

Page exists with strong meta description

Page subheading says 'About Visual Studio' (not 'About X Studios')

Evidence: Currently: 'About Studios' — appears the brand name was partially deleted, leaving an awkward double space and generic word

Origin story uses 'Visual Studio' brand name

Evidence: Currently: 'X Studios began as an extension of our first venture, X Print' / 'Today, X Studios is a dedicated photography and videography company'

H.2 Trust signal

Husband-and-wife / team trust statement at the top of the page

Evidence: No mention of female team, husband-and-wife dynamic, or modesty-aware culture anywhere on /about

Female crew availability mentioned on /about

Evidence: Homepage has this prominently. /about — where clients build trust — does not mention it at all

Studio overview / location grounding

H.3 Team profiles

3 team members listed: Mohammed Sakib, Md Shadman Mahmood, Syed Md Mahid

Each team member has photo, name, role, bio

**Team bios use 'Visual Studio' brand name**

Evidence: Mohammed Sakib bio: 'CEO and Creative Director of X Studios & Director of X Print' / Shadman bio: 'CEO of X Print, and Founder at X Studios' / Mahid bio: 'X Studios (as a photo editor)'

**Bios framed from Visual Studio's perspective**

Evidence: Mahid's bio reads as a list of external job affiliations (FoodPanda, Kidzania, Quest Films, East West University) more than a Visual Studio team member intro

H.4 Studio photos

**Studio space photos on the page**

Evidence: No images of the studio space (1097 Liberty Avenue, Brooklyn)

H.5 Partners section

**Reference / link to partners from More Services**

Evidence: Not present

H.6 Footer on this page

WhatsApp 'Us' link in footer

Evidence: Missing — /about uses the alternate footer with phone, email, address only

Footer Resource links work

Evidence: Resources block shows 'Download Pricing PDF Soon' — not a link, just placeholder text

H.7 Meta and OG

Strong meta description and keywords

twitter:card matches the rest of the site

Evidence: /about uses 'summary_large_image' but homepage uses 'summary'

twitter:title matches the page

Evidence: /about twitter:title is the homepage title 'South Asian & Muslim Wedding Photographer NYC' — should be the about page title

I. Contact

/contact

Status: Page exists with good meta but content visible to crawlers is limited.

I.1 Page meta

Strong meta description targeting booking intent

OG image and twitter:card set

I.2 Page content

'Get In Touch' heading + intro copy

Contact form visible in static HTML

Evidence: Form is JavaScript-rendered — crawlers see only the heading, intro, and testimonials. No form fields, no Calendly embed text in crawlable HTML

Testimonials section repeated on this page (good for cross-page social proof)

Reviews appear once each (not 3× repetition)

Evidence: Same carousel loop issue as homepage — 6 reviews appear 3 times in HTML

Contact form actively tested

Evidence: Need to verify form submissions email Sir reliably (cannot verify from crawl alone)

10% off promo display

Evidence: Brief calls for visible 10% discount when client requests an estimate. Not present

I.3 Header and footer

WhatsApp in header

WhatsApp 'Us' in footer

Correct phone (347-306-6637) in footer

J. Muslim-Friendly Services

/muslim-friendly-services

PAGE STATUS — STRONGEST PAGE ON THE SITE

This is the best-built page on visualstudioslens.com. Clear, well-structured, with operational detail not just marketing copy. Only weakness: not in the main navigation.

J.1 Page meta

- ✓ Strong meta description with keyword targeting
- ✓ Keywords include: muslim wedding photographer, female crew, no-music wedding, hijabi bride, halal wedding

J.2 Page content

- ✓ Hero with 'Honoring Your Faith & Culture' eyebrow
- ✓ 5 service tracks: No-Music Edits, Islamic-Touch Editing, Female Crew Workflow, Modesty-Aware Coverage, Cultural & Religious Fluency
- ✓ 'Female Crew. Female Editor. End to End.' featured section
- ✓ Calendly booking link
- ✓ Cultural traditions list (Nikkah, Walima, Mehndi, Holud, Akht, Bou Bhat, Bengali, Pakistani, Arab, Afghan)
- ✓ 5 FAQ Q&As specifically for Muslim families (no-music edits, hijabi brides, gender separation, Islamic-touch, traditions)
- ✓ Long SEO content section at bottom with hardcoded service descriptions
- ✓ Address grounding (1097 Liberty Avenue, Brooklyn) in body content

J.3 Discoverability

- ✗ Page in main navigation

Evidence: Currently only reachable via the homepage 'Female Crew' section link. Clients landing on /portfolio, /about, etc. cannot find this page from the nav

J.4 Header and footer

WhatsApp in header

WhatsApp 'Us' in footer

Correct phone in footer

K. FAQ

/faq

PAGE STATUS — STRUCTURE GOOD, ANSWERS INVISIBLE

25 well-categorized questions are present. But all answers are JavaScript-rendered — crawlers and AI assistants only see the question titles, not the answer text. This means FAQPage schema cannot fire and Google rich results from this page are impossible.

K.1 Page structure

✓	Page exists with strong meta description
✓	25 questions organized into 4 categories: Booking & Pricing, Cultural Coverage & The Day Itself, Delivery & Editing, Logistics & Extras
✓	Cultural-specific questions present (female photographers, traditions, Vidaai/Rukhsati, Desi time)
✓	Operational questions present (insurance, COI, sick photographer, planner coordination)

K.2 Crawlability

✗	Answers visible in static HTML <i>Evidence: Only question titles render in crawlable HTML — answers are accordion/JavaScript-rendered. Google and ChatGPT cannot read any answers</i>
✗	FAQPage schema markup wrapping the questions

K.3 Footer on this page

✗	WhatsApp 'Us' in footer <i>Evidence: Missing — /faq uses alternate footer</i>
---	---

K.4 Meta tags

✓	Strong meta description
✗	Canonical URL uses www subdomain <i>Evidence: og:url for /faq is 'visualstudioslens.com/faq' — missing www. All other pages use www. Minor inconsistency</i>

L. Privacy Policy

/privacy-policy

L.1 Content

✓	Comprehensive policy with 7 numbered sections
✓	Sections cover: data collected, how used, sharing, retention, your rights, security, contact
✓	Effective date and update mechanism stated
✓	Visual Ink LLC named as the controller
✓	Contact methods listed (email, phone, address, website)

L.2 Issues

✗	Legal name spelled correctly throughout <i>Evidence: Reads 'Visual Studios & Events & Events (operating under Visual Ink LLC)' — '& Events' duplicated as a typo</i>
✗	Page indexed by search engines <i>Evidence: meta robots set to 'noindex, nofollow' — pages indexed normally show legitimacy. Optional fix</i>
✗	OG tags reference this page specifically <i>Evidence: og:url and og:title both point to homepage instead of the privacy page</i>

L.3 Header and footer

✓	WhatsApp in header
✓	WhatsApp 'Us' in footer
✓	Correct phone in footer

M. Terms of Service

/terms-of-service

M.1 Content

✓	Comprehensive 11-section Terms covering all major scenarios
✓	Booking, payment, cancellation, IP rights, client conduct, liability all covered
✓	Delivery timelines stated per service type
✓	Governing law (New York) and dispute resolution (arbitration in Queens County) stated
✓	Visual Ink LLC named as the operating entity

M.2 Issues

✗	Legal name spelled correctly throughout <i>Evidence: Same '& Events & Events' duplication appears in Section 1 and Section 2</i>
✗	Delivery timeline consistent with FAQ and packages page <i>Evidence: Terms Section 8: 'Wedding & Event Coverage: 6 to 8 weeks'. FAQ and packages: 'Full edited photo gallery in 3–4 weeks'. These conflict — clients who read both will notice</i>
✗	Page indexed by search engines <i>Evidence: meta robots set to 'noindex, nofollow' — same as privacy page. Optional fix</i>
✗	OG tags reference this page specifically <i>Evidence: og:url and og:title both point to homepage instead of the terms page</i>

M.3 Header and footer

✓	WhatsApp in header
✓	WhatsApp 'Us' in footer
✓	Correct phone in footer

N. Pages NOT Yet Built

Pages referenced in earlier briefs or footer links that do not currently exist.

X

/no-photo-security

Evidence: Service page for the standalone No-Photo Security offering. Brief recommended a card on /more-services + dedicated landing page. Neither exists.

X

/business-setup (or equivalent)

Evidence: Service page for the 'Set Up My Business' CTA from the three-CTA structure on Visual Marketing. Not built.

X

/web-design (or equivalent)

Evidence: Service page for the 'Build My Website' CTA. Not built.

X

/events

Evidence: Linked from /more-services footer ('Events & Decor → /events') but returns 404. Either build the page or remove the link.

X

/blog

Evidence: No blog exists. Long-term SEO recommendation — even 1 post per month builds authority. Not urgent.

X

Sub-portfolio pages by tradition (e.g. /portfolio/bengali, /portfolio/pakistani)

Evidence: Could improve SEO for tradition-specific search terms. Not a priority.

O. Technical SEO Infrastructure

Files and configurations that exist outside the page structure but affect every page's discoverability.

O.1 Crawler files

/sitemap.xml exists

Evidence: Returns 404. Should list all 11 live pages with priorities and update frequency

/robots.txt exists

Evidence: Returns 404. Should explicitly allow GPTBot, ClaudeBot, PerplexityBot, etc.

/llms.txt exists (emerging standard)

Evidence: Optional but increasingly important for AI assistant discoverability

O.2 Schema markup

LocalBusiness JSON-LD on root layout

Organization JSON-LD on root layout

Service JSON-LD on service pages

FAQPage JSON-LD on homepage and /faq

Review / AggregateRating JSON-LD

BreadcrumbList JSON-LD on sub-pages

O.3 Search Console / Bing

Domain verified in Google Search Console

Evidence: Cannot verify from crawl, but if sitemap doesn't exist, Search Console likely not configured

Sitemap submitted to Google Search Console

Domain verified in Bing Webmaster Tools

O.4 Performance basics

Site uses Next.js with proper sub-page URLs (good)

Images optimized via Next.js `_next/image` (good)

Static HTML for AI crawlers

Evidence: Many key elements (FAQ answers, contact form, testimonial loop) only render after JavaScript executes — invisible to most AI crawlers

P. Final Priority Summary

Every red X from the audit, ordered by urgency. Saikat works top-down.

P.1 Critical — Do this week

- X Find-and-replace 'X Studios' → 'Visual Studio' and 'X Print' → 'Visual Ink Printing' across the entire /about page
- X Fix the page subheading on /about (currently 'About Studios' with broken double space)
- X Standardize the footer across ALL pages — single shared component with WhatsApp + correct phone
- X Fix /more-services footer phone number (929 → 347)
- X Fix legal name typo: 'Visual Studios & Events & Events' → 'Visual Studios & Events' on Privacy and Terms pages
- X Fix /more-services partner links — three cards currently all point to neonskiesdecor
- X Either build /events page or remove the link from /more-services footer (currently 404)

P.2 High value — Do soon

- X Build out /portfolio with actual photo galleries, organized by tradition
- X Build out /video-gallery with actual video embeds (YouTube playlist or Vimeo)
- X Replace Giphy GIF placeholders on /visual-marketing with real commercial work
- X Add Muslim-Friendly Services to main navigation (currently buried)
- X Render FAQ answers in static HTML (not JavaScript-only)

X	Add trust signal copy to /about (female team, modesty-aware culture)
X	Fix testimonial carousel — render each review once in HTML, not 3 times
X	Resolve delivery timeline conflict (Terms says 6-8 weeks, FAQ says 3-4 weeks)
X	Reconcile Mahid's bio on /about — currently reads as external job list, not Visual Studio team intro

P.3 Technical SEO — Do soon

X	Generate /sitemap.xml via Next.js app/sitemap.ts
X	Generate /robots.txt via Next.js app/robots.ts (with AI bot allowlist)
X	Add LocalBusiness + Organization JSON-LD to root layout
X	Add FAQPage JSON-LD to homepage and /faq
X	Add Service JSON-LD to /muslim-friendly-services and /visual-marketing
X	Submit sitemap to Google Search Console + Bing Webmaster Tools

P.4 New features — Do when ready

X	Build /no-photo-security service page
X	Add No-Photo Security card to /more-services
X	Replace single 'Start a Project' CTA on /visual-marketing with three CTAs (Marketing Videos / Set Up My Business / Build My Website)
X	Build /business-setup intake or contact form variant
X	Build /web-design intake or contact form variant
X	Add 10% off promo display in estimate / project intake flow
X	Add source badges (Google Review / Instagram) to testimonials

P.5 Polish — Do over time

X	Standardize twitter:card to 'summary_large_image' across all pages
---	--

X	Fix OG tags on Privacy and Terms (currently point to homepage)
X	Fix /faq canonical URL to use www subdomain consistently
X	Add studio space photos to /about
X	Fix dead 'Client Portal' and 'Download Pricing PDF' links in footers
X	Add 'Reactions' content section to /portfolio
X	Add commercial logos / 'who we worked with' to /portfolio
X	Add BreadcrumbList JSON-LD to all sub-pages

Final Notes

WHAT'S WORKING WELL

Strong technical foundation — Next.js, proper sub-page URLs, complete meta tags on every page.
Excellent /muslim-friendly-services page — best-built page on the site.
Strong package structure (verified separately, not detailed here per Sir's request to exclude pricing).
Named testimonials are live with real names, locations, and event types.
WhatsApp infrastructure largely in place (just needs unification across pages).
Cultural-tradition coverage on homepage is thorough and well-targeted.

THE THREE THINGS THAT MATTER MOST

1. Fix /about — find-and-replace 'X Studios' / 'X Print' across the entire page. This single fix improves SEO entity recognition more than any other change.
2. Build out /portfolio and /video-gallery. For a photography and videography business, these two pages being empty is the worst possible UX issue.
3. Unify the footer across all pages so every page has WhatsApp + correct phone. Right now the site has two footer variants and one wrong phone number that hurts local SEO.

HOW TO USE THIS DOCUMENT WITH AI ASSISTANTS

Saikat can paste this entire document into ChatGPT, Claude, or Cursor and ask the AI to implement specific items by section number (e.g. 'implement everything in Section P.1').
Each red X has Evidence so the AI can verify the current state before making changes.

JazakAllah khair,

Mohammed Sakib Mahmood

Founder, Visual Studio | Visual Inked LLC
